Clean Care — Feature Specification

Oct 5, 2026 · @PremierCement

Overview

Clean Care is a citizen waste-complaint and waste-management platform for Dhaka South City Corporation (DSCC). It has an Android app and a Bangla-language landing site. Citizens report waste problems with a photo and their GPS location, the ward team is dispatched, and the citizen is notified when the problem is fixed.

Attribute	Value
Owner	Dhaka South City Corporation (dscc.gov.bd)
Developer and IT consultant	Inoxt
Coverage (as claimed on the site)	47 wards, 24/7 monitoring, 100% digital
Citizens joined (as claimed on the site)	12,400+
Platforms	Android (Google Play: com.cleancarebd.app), plus the landing website
Language	Bangla
Tagline	"Your City, Your Care"

Core features

The site lists six headline features. Photo reporting is the main one; the other five support tracking, communication and transparency.

#	Feature	Category	What it does	User value
1	Photo report	Reporting system	Report a waste problem with a photo and location; it goes straight to the responsible ward team	Faster pickup with no phone calls or office visits
2	Live tracking	Real-time tracking	Shows where waste-collection vehicles are in real time and when they will arrive	Know when the truck will arrive
3	Transparent accountability	Digital record	Tracks the progress of every report and keeps it as a digital record	Complaints can no longer be silently ignored
4	Smart notifications	Push notifications	Collection schedules, ward updates and government announcements, sent to the phone	Get schedules and notices without looking for them
5	Direct contact	Live support	Chat directly with the authorities about any problem	Faster answers and escalation
6	Dashboard	Analytics	Shows how clean-up is going in the user's ward	Decisions based on data

Complaint lifecycle

A complaint moves through four steps. The site claims an average resolution time of 3 to 6 hours.

1. **Take a photo**: the citizen photographs the waste problem; the GPS location is attached.
2. **Send the report**: one tap sends it to the responsible team for that ward.
3. **Team assigned**: the authority immediately dispatches the nearest cleaning crew.
4. **Resolution confirmed**: the citizen gets a notification when the work is done and can leave a review.

Behind the scenes, the complaint details are shared with the ward's assigned waste-collection contractor (PCSP) or contractor. Each complaint also has its own chat thread for follow-up.

App modules and screens

The app mockups on the site show four main tabs plus a home screen of quick actions.

Screen or module	Elements shown
Home	DSCC campaign banner; quick actions: Customer Care, Live Chat, Waste Management, Emergency, Complaint (photo); notification badge; overflow menu
DSCC Notice Board	Ward-level waste-removal and awareness notices
New complaint form	Take a photo with the camera; category picker (e.g. household waste removal); GPS location with automatic ward and area (e.g. Ward 36, Motijheel); submit button; help icon
Complaints tab	List of the user's complaints and their status
Notices tab	Notifications and announcements
Profile tab	Profile details and the Delete Account button
Chat	Complaint chat and live chat with attachments, photos and voice recordings

Complaints can be submitted as text, photos or voice recordings. Categories have subcategories.

Account, data and privacy

Users register with a phone number, email and password. The app asks for three device permissions: camera, gallery/storage and microphone. Details are from the User Privacy Policy.

Area	Feature
Account	Register, log in and verify the account with name, phone, email and password
Profile	Profile photo, address, and ward / zone / city corporation
Complaint data	Description, category/subcategory, address

Area	Feature
Media	Photos and voice recordings in complaints and chat
Permissions	Camera (complaint photos), gallery/storage (upload), microphone (voice complaints and chat)
Offline cache	Login token, notifications, complaint list and chat cached on the device; token cleared on logout
Push	FCM notification token for each device
Data sharing	Shared with DSCC and the ward PCSP/contractor only; no other third parties unless the law requires it
Security	Encrypted transmission, access control, password hashing, refresh tokens
Safety	In-app reporting of offensive content; zero tolerance for CSAM; violators banned and reported to NCMEC or law enforcement
User rights	Update the profile; ask for data to be corrected or deleted

Account deletion

Accounts can be deleted in the app or on the web. Sessions are revoked immediately, and the data is fully purged within 7 to 30 working days. Source: the Account Deletion Portal.

- **In the app:** Profile tab → red Delete Account button → confirm.
- **Web portal fields:** registered phone or email, password, a reason from a dropdown, an optional comment, and a confirmation checkbox.
- **Reasons offered:** moved out of the city corporation area; privacy concerns; technical problems; duplicate or temporary account; other.

Data	Treatment
Name, phone, email, profile photo	Deleted permanently
Password hash, sessions, refresh tokens	Deleted permanently
FCM token, device identifiers	Deleted permanently
Live chat, notification history, direct messages	Deleted permanently

Data	Treatment
Past complaints (location, clean-up report)	Kept anonymised for government audit
Security and audit logs	Kept for a fixed period
Account deactivation	Immediate
Purge from backups and archives	7 to 30 working days

Website features

The landing site is a single page built to get people to download the app. Every download button links to Google Play.

Section	Content
Hero	"DSCC approved" badge, Live tag, Download and See problems buttons, stats (47 wards, 24/7, 100% digital), phone mockup
Problems	Four pain points, each with a figure
Solution	The 4-step workflow and a Get started button
Features	The six core features
Impact	Live counters: successful reports, active wards, resolution rate, average resolution time
Call to action	"If not you, who?" message and a Report button
Testimonials	Three citizens (Wards 29, 36, 42)
Movement banner	12,400+ citizens, 47 active wards
App preview	Mockup of the complaint screen
Download	Google Play and App Store buttons
Citizen guidelines	Six rules: put waste in designated places, on time; avoid pollution; recycle; report through the app; make neighbours aware
Partner	Inoxt profile and tech stack
Footer	Quick links, Privacy Policy, Account Deletion, API Status (/api/health), contacts, "API Server Active" indicator

Navigation uses anchor links: Problem, Solution, Features, Impact, Mission, Services, Guidance, Partner.

Problem vs solution

Each problem on the site is matched by a Clean Care feature. The figures are the site's own claims.

Problem (before)	Site's figure	Clean Care answer (after)
Waste is not cleared on time	72h+ average wait	Photo report sent to the ward team; claimed fix in 3 to 6 h

Problem (before)	Site's figure	Clean Care answer (after)
No tracking	0% real-time tracking	Live vehicle tracking with arrival times
Complaints ignored	85% of complaints not followed up	Digital record and status for every complaint, plus notifications
No transparency	No data for citizens	Ward analytics dashboard and live impact counters
Phone or office complaints go unanswered	Not stated	In-app live chat with the authorities

Tech stack, contacts and gaps

Stack (listed on the site): Node.js, TypeScript, PostgreSQL, React, Railway Cloud, IoT.

Contact	Detail
Developer (Inoxt)	info.inoxt@gmail.com
User support	clncrspprt@gmail.com, +880 1577-262723
Authority	Dhaka South City Corporation, dscc.gov.bd

What I noticed on the site:

- The App Store button links to Google Play, so there is no iOS app yet.
- The impact counters showed 0 when the page loaded. They probably fill in live from the API, or the API returned nothing.
- The hero says "DSCC approved", while the testimonials and the 72h, 85% and 3 to 6 h figures are the site's own claims, with no source given.
- Live vehicle tracking and the analytics dashboard are advertised, but the app mockups don't show either screen.
